

Appendix 6

Record of Protected Structures

Appendix 6 Record of Protected Structures

EXPLANATORY NOTES

The definition of a “structure” in the Planning and Development Act 2000, as amended is as follows:

“Any building, structure, excavation, or other thing constructed or made on, in or under any land, or any part of a structure so defined, and –

- a. where the context so admits, includes the land on, in or under which the structure is situate, and*
- b. in relation to a protected structure or proposed protected structure, includes–*
 - i. the interior of the structure,*
 - ii. the land lying within the curtilage of the structure,*
 - iii. any other structures lying within that curtilage and their interiors, and*
 - iv. fixtures and features which form part of the interior or exterior of any structure or structures referred to in subparagraph (i) or (iii)*

In addition to the above the Planning and Development Act 2000, as amended defines a “Protected Structure” as:

“ a. structure, or

b. specified part of a structure,

Which is included in a record of protected structures, and, where that record so indicates, includes any specified feature which is within the attendant grounds of the structure and which would not otherwise be included in the definition”.

The Record of Protected Structures contains the structures protected under Section 51 of the Planning and Development Acts (as amended) for County Meath.

With the abolition of the Town Councils of Navan, Trim and Kells, the RPS for these towns is now incorporated into the RPS for the County. The *Ordnance Survey Ireland* National Administrative boundary identifier for County Meath is 09. RPS ID numbers will be changed as part of this County Development Plan to allow RPS ID Numbers to incorporate this new national identifier. For reference the original ID number is shown to the right of the new *LA RPS ID* number in column “*Previous RPS ID*”.

The Record of Protected Structures is displayed in the form of a table, the rows relate to individual structures and the columns correspond to various fields of information relating to each Structure, outlined below.

The **LA RPS ID** is a unique reference number identifying the structure on the RPS database of protected structures in Meath and on the set of Settlement Maps accompanying this Plan. RPS records are classified according to their AIS Identifier, where

- **P** - Proposed Addition.
- **PA** - Proposed Amendment.
- **PD** - Proposed Deletion.
- **R** - On the Record of Protected Structures.

Previous RPS ID, this was Meath's internal reference number applied to each RPS for administrative purposes on County Development Plan 2013-2019.

Town

Street/Townland gives the location of the structure within the survey area either by street or townland name.

CDP Settlement Boundary

Structure Name refers either to the title of a building, e.g. Garda Station, or the name of the business currently located in a building, e.g. 'The Village Inn' or the generic name of a structure e.g. post box, or dwelling house. In certain cases where limited protection applies this is indicated in this column – e.g. "façade only"

Structure Number is the postal address number of the building in a particular street, or the number shown on the façade or shop front signage.

Building Type relates to the current use of the building, usually at entrance level only.

Description gives a brief description of the structure. This is intended to identify the structure and avoid confusion with other, similar structures. It is not a complete description of the structure and does not suggest that only those elements referred to are protected, or that the elements so described are of particular importance.

NIAH Reg. Number refers to the registration number on the National Inventory of Architectural Heritage building survey of County Meath. The NIAH is a section within the Department of the Culture, Heritage and the Gaeltacht. The work of the NIAH involves identifying and recording the architectural heritage of Ireland, from 1700 to the present day. You see this survey on line at www.buildingsofireland.ie

While the majority of the structures in the NIAH survey are included on the RPS, not all are. In addition, the RPS contains other structures which were not visited by the NIAH.

Abbreviations:

- AIS: Architectural Inventory System.
- NIAH: National Inventory of Architectural Heritage.
- P: Proposed Addition.
- PA: Proposed Amendment.
- PD: Proposed Deletion.
- R: On the Record of Protected Structures.
- RPS: Record of Protected Structures.
