il: 16.7 (?)

FMH EX C1
cl: 17.67
il: Unknown

It is assumed that this small section of existing storm sewer (picked up on the topographical site survey), is localised and deposits into the main combined sewer, crossing the site, as there is no evidences of a separate stormwater sewer on Irish Water record drawings. To be confirmed on site.

- NOTES**
- Drawings to be read in conjunction with all relevant Architects, Engineers and specialist drawings.
 - Check for any discrepancies between drawings and site conditions. Report any discrepancies to the Engineer in Charge.
 - Inform the Engineer of any discrepancies prior to proceeding with works.
 - This drawing should be printed in colour for clarity.
 - Check for any discrepancies between drawings and site conditions. Report any discrepancies to the Engineer in Charge.
 - All construction, including site to be done safely in accordance with Irish Water specifications & details.
